

Qualified Local Bahamian Companies Interested in Partnerships for Micro-grid & Renewable Energy Project

MoEP-RFP-01/2024-GD-4242

In early December 2023 the Government of the Bahamas issued a Request for Proposals to construct solar electricity generation - along with other renewable sources - and micro-grids to support energy self-sufficiency in the country's Family Islands. Canada's Trade Commissioner Service (TCS) has received inquiries from Canadian companies interested in responding to the RFP and who are looking for local firms with which to work.

Consequently, TCS has compiled a list of companies which are both qualified to bid on the projects and which are interested in working with foreign firms. They are:

Phoenix Engineering Group
